

Company Information

Topia is involved in all types of manufacturing, including automobiles, aircraft, and electric appliances. We deal directly with major automotive manufacturers as the automobile market accounts for the majority of our sales.

Our strength lies in our design and analysis technologies using state-of-the-art equipment and digital technologies. We are also promoting concurrent engineering to improve quality and shorten development time.

In the field of prototyping metal products, we boast top sales in the industry. Our parts play a key role in the development of new models by automotive manufacturers.
